This map was compiled from U.S. Geological Survey quadrangle maps and aerial photography from 1985-2000. Street names, official highway, road and inventory surveys, U.S. Geological Survey, and other maps. This map was compiled using interactive computer graphic techniques.

This map was prepared on the Lambert conformal conic projection, 1983 North American Datum, North Zone, Florida system of plane coordinates. The nearest station system as shown on this map does not necessarily denote the presence of a depth or level facility. It may be only a spot designated for the receipt or delivery of freight, even as a platform or siding.

Local road alignments in delineated areas and easements shown under development are not indicated.

No attempt has been made to show all drainage canals and ditches.

In congested areas local roads are indicated by a single line only, for details refer to insets prepared for this county.

This map does not include the city streets of Tallahassee which are on the county maintained highway system.

City populations are taken from the U.S. Census for 2000.

In 2000, the population of Leon County was 239,452. There are 685 square miles in the county.

No claims made for the basic cartographic source material taken from a work of the United States Government.

Most of this series are in the public domain. The maps are controlled and published using public law and are subject to government review and use for profit.

Permission to copy or reproduce this map must be authorized by the Surveying and Mapping Office, Department of Transportation, Tallahassee, Florida 32399-0450.
